Art Unit: 1621

The following is an examiner's statement of reasons for allowance: The instant application is allowable because the prior art doesn't teach or suggests applicant's invention wherein amines are produced by hydrogenating nitriles in the presence of a supported Pd/Ni catalyst with a promoter selected from zinc, cadmium, copper or silver. Ostgard et al., US 6,649,799, cited as state of the art only, disclose a similar reaction with hollow Raney catalysts of nickel, copper, iron, palladium or platinum although those based on cobalt and ruthenium are preferred. Vedage et al. US,5,574,189, cited as state of the art only, disclose a similar reaction with a catalyst preferably comprising nickel or cobalt in combination with rhodium, ruthenium or palladium. The use of applicant's combination of supported catalytic metals and promoter metals is not taught or suggested by the prior art for the hydrogenation of aliphatic nitriles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Peter G O'Sullivan at telephone number (571)272-0642.
